## What is Catonsville Travel Vaccines?

We are the only Travel Health Specialists in the Catonsville Area. We provide prospective travelers, adults and children with pre-travel counseling along with immunizations and medications needed to stay healthy while traveling abroad. Approximately 9 million Americans travel to developing countries where there is a greater risk of catching tropical and infectious diseases. Depending on the country, travelers are exposed to malaria, typhoid fever, yellow fever, intestinal infections, and numerous other diseases. Our job is to make sure travelers are protected from the many diseases that exist outside of the United States.

### Yellow Fever Site

Catonsville Travel Vaccines is licensed by the state and the Center for Disease Control, as an official yellow fever vaccination site.

### Travel Vaccines

#### Vaccines offered include:

Adult Tetanus	Yellow Fever
Hepatitis A	Japanese Encephalitis
Hepatitis B	Polio
Rabies	Meningococcal
Typhoid Fever	Meningitis

## Our Services and Fees

Payment is collected at time of service. We offer several levels of service. Please call our office or check the website for current fees.

### Vaccines Only

For the knowledgeable traveler who knows which vaccines he requires. The traveler, completes a medical history—then pays a vaccine fee plus the cost of the vaccines.

### Medications Only

Prescriptions are written for Malaria, traveler's diarrhea, motion sickness, etc. A medical history is completed, the requested prescriptions are written, and a medication fee is charged.

### Travel Consultation in Office

Read the next page for details. For the first time traveler, this is the best option.

### Travel Consultation by Mail

A travel history is completed (obtained from website, faxed or mailed). The history is sent back to our office with the payment. A comprehensive report is mailed to the traveler including recommended vaccines and medications. The traveler decides which vaccines and medications he would like to receive and makes an appointment. This is a very convenient option.

## CDC Travel Health Information

The Center for Disease Control provides information about all of the regions in the world. Information is provided concerning malaria advisories, vaccine requirements, disease risk and much more. The CDC offers many options for obtaining this information.

## Travel Consultations

With our up-to-date information on all countries, you will be prepared for your journey. Disease outbreaks occur all over the world and vaccine recommendations will change. Your medical history is reviewed and we explain why certain vaccines are recommended. Some patients may have special situations such as pregnancy, travel with children or teenagers or diabetes. Catonsville Travel Vaccines uses a database, compiled from the CDC and WHO recommendations, that provide specific and up-to-date health alerts that are updated daily. We provide clients with country specific verbal information, as well as a personalized report on the country to be visited. This printed report contains the most up-to-date information concerning the health risks, recommended vaccines, food and water precautions, basic country specifics, and U.S. State Department Advisories for each destination you plan to visit.

In addition, medications may be prescribed for the prevention of malaria, motion sickness, altitude sickness, and traveler's diarrhea.
