

Countries with risk of yellow fever transmission¹

Africa			Central and South America
Angola Benin Burkina Faso Burundi Cameroon Central African Republic Chad ² Congo, Republic of the Côte d'Ivoire Democratic Republic of the Congo Equatorial Guinea	Ethiopia Gabon The Gambia Ghana Guinea Guinea-Bissau Kenya Liberia Mali ² Mauritania ² Niger ²	Nigeria Rwanda Sierra Leone São Tomé and Príncipe Senegal Somalia Sudan ² Tanzania Togo Uganda	Argentina ² Bolivia ² Brazil ² Colombia Ecuador ² French Guiana Guyana Panama ² Paraguay Peru ² Suriname Trinidad and Tobago ² Venezuela ²

¹Countries/areas where "a risk of yellow fever transmission is present," as defined by the World Health Organization, are countries or areas where "yellow fever has been reported currently or in the past, plus vectors and animal reservoirs currently exist" (see www.who.int/ith/countries/2008_country_list.pdf (PDF)).

²These countries are not holoendemic (i.e., only a portion of the country has risk of yellow fever transmission). Please see Maps for details.

Yellow fever-endemic zones in Africa, 2009

Yellow fever-endemic zones in the Americas, 2009
